-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

1. The disclosure is objected to because of the following informalities: the specifications should be amended to include a brief description of each drawing. Also, the brief summary of the invention should be amended to be separate and distinct from the abstract.

Appropriate correction is required.

### ***Claim Objections***

2. Claim 1 is objected to because of the following informalities: In reference to Claim 1, it is clear that the indicator provides indication rather than sensing. So the claimed rear light out "indicator" in Ln 1 should be changed to sensor and in Ln 2, "sensor(s)" should be "sensor" in order to be consistent with the word "a".

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement.

Regarding Claim 1, the disclosure does not provide enabling embodiment as to how does the claimed invention detect the rear light being broken.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 1 rejected under 35 U.S.C. 102(b) as being anticipated by Brouwer et al. (US 4,068,216).

Regarding claim 1, Brouwer teaches *Bulb Outage Warning System* that has the claimed limitations:

The claimed invention in which a sensor will illuminate in the dashboard area to indicate to the driver when a rear light of a vehicle is out is met by an indicator on the dashboard of the vehicle to indicate the condition of a burned out filament, see Col. 2, Lns 53-56.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lusk et al, *Vehicle Condition Monitoring* (US 3,975,708)

Art Unit: 2632

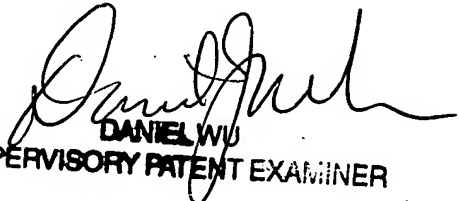

Endoh, *Lamp Burnout Detection Unit With Branch Connection Function* (US
